SENTIENT JET

KiZAN Customer Success Story

Highly Available Hybrid Database Environment

Sentient Jet is a leading provider of private aviation services who operates mission-critical applications that require 24/7 availability.

KiZAN architected the SQL Server environment, defined a disaster recovery plan enabling recovery from datacenter-wide failures, implemented the database environment and executed the migration to the new environment with minimal downtime. The solution included a three-node Windows Server Failover Cluster with SQL Server Always On Availability Groups.

Microsoft®
SQL Server®

Challenges:

▶ Migrating from legacy platform

▶ Critical applications needed 24/7 - No Downtime!

Solutions:

▶ Architected SQL Server environment

▶ Defined disaster recovery plan enabling recovery from datacenter-wide failures

▶ Included a three-node Windows Server Failover Cluster with SQL Server Always On Availability Groups

Results:

▶ The new highly available SQL Server environment enabled Sentient Jet to host its mission-critical applications with confidence in its ability to provide reliable, uninterrupted services to its clients.
